THE BRAND

Spaces with stories of their own.

Archipixels is an architecture and interior design studio in Gomti Nagar, Lucknow, founded in 2018 by Shivika and Abhinav. The work is layered, expressive and sometimes unexpected, and always careful in its details. Every project begins with a different story, and no design is repeated.

SIGN-OFF

Design that works.

CLOSING LINE

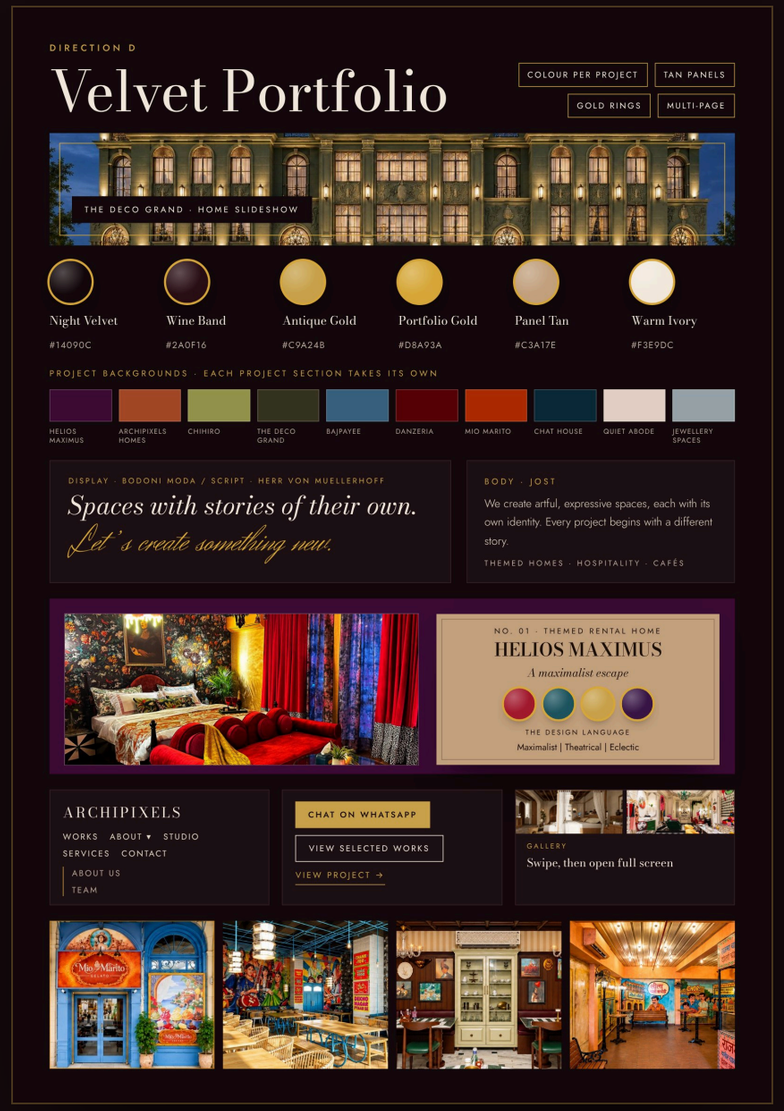

Let's create something the world hasn't seen yet!

SERVICES

Architecture, interior design, space planning and turnkey projects.

CLIENTS

Homes, hotels, restaurants, offices, salons and townships. The studio works for every kind of client.

Velvet Portfolio.

The site is a gallery to walk through. Night Velvet carries the page, gold draws the lines, a tan panel holds each project's story and the colour of every project fills its own section.

- Colour per project, so each work keeps its own atmosphere.
- Tan panels, one for every project, always the same.
- Gold rings around the swatches, and gold hairlines for rules and frames.
- Large Bodoni headlines, quiet Jost text, and a script signature for the closing line.

LOGO

The mark, the wordmark and the line.

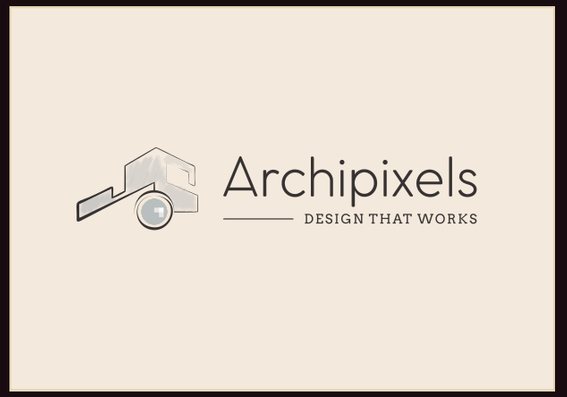

Horizontal. The default, used in the website header.

Stacked. For the footer, the closing page and square spaces.

Mark. For icons and very small sizes.

Dark ink version for ivory and tan backgrounds.

Clear space. Keep a margin around the logo equal to the height of the letter A in the wordmark.

Minimum size. The horizontal logo is never narrower than 120 px on screen or 30 mm in print. The mark alone is never narrower than 28 px.

Backgrounds. The white logo goes on Night Velvet, Wine Band, burgundy and project colours. The dark logo goes on Warm Ivory and Panel Tan.

LOGO, WHAT TO AVOID

Keep the logo as it was drawn.

✕ Do not stretch

✕ Do not recolour

✕ Do not rotate

✕ Do not place on busy photos

Use the supplied files only. Do not redraw the mark, change the spacing between the mark, the wordmark and the line, or set the wordmark in another typeface.

COLOUR

Gold on velvet.

Night Velvet

#14090C · RGB 20, 9, 12

The page background of the site. Almost black, with a trace of wine.

Wine Band

#2A0F16 · RGB 42, 15, 22

Bands and panels that sit on Night Velvet.

Antique Gold

#C9A24B · RGB 201, 162, 75

Eyebrows, rules, rings, links and the gold button on the website.

Portfolio Gold

#D8A93A · RGB 216, 169, 58

The brighter gold of the one-page portfolio and the swatch rings.

Panel Tan

#C3A17E · RGB 195, 161, 126

The panel on every project page. It holds the name, palette and design language.

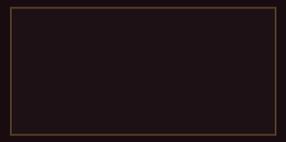

Warm Ivory

#F3E9DC · RGB 243, 233, 220

Headlines and body text on dark pages. Never pure white.

Each project takes its own colour.

On the website and in the portfolio, a project section uses the page colour taken from that project's palette. The text colour is chosen for contrast. The tan panel stays the same on every project, so the studio's frame holds the colours together.

GOLD RULES

Hairlines in Antique Gold draw out under headings and frame photographs. Corners stay square and shadows stay warm.

PHOTOGRAPHY

The photograph carries the page.

- Photographs are the largest element on any screen and sit close against the colour.
- Show the whole room or the one detail that makes it. Crop tightly and keep the colour true.
- Frame a photograph with a thin gold line and a warm shadow, never a white border.
- Use the studio's own project photographs. Keep people in shot natural and unposed.
- Photos are saved as JPEG at quality 90, and no photo is shown larger than its file.

IN USE

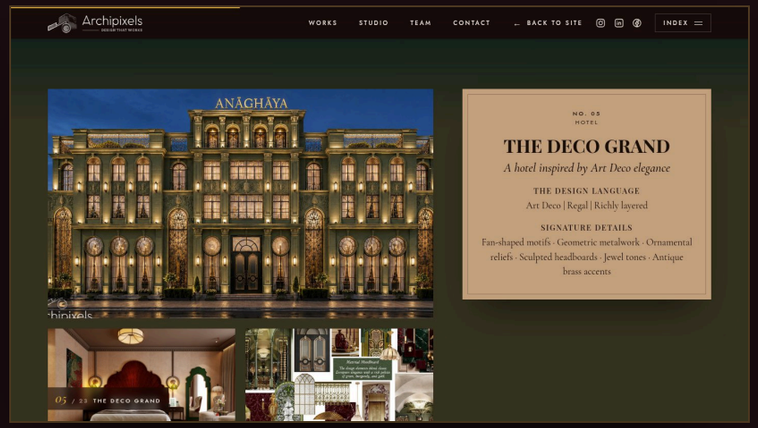

On the website.

Home. The slideshow, the headline and the gold button.

Portfolio cover. A photograph under the veil, the name in capitals.

Project section. Its own colour, photographs and the tan panel.

A gallery to walk through.

LAYOUT

Wide pages with generous space. Content sits in a column up to 1280 px, with side gutters of 18 to 48 px. A section has 72 to 144 px of space above and below on the home page and half of that on inner pages. Work walls are four across on desktop, three on tablet and two on phones.

MOTION

Soft and slow. Photographs fade up from the page colour, headings reveal word by word, and cards rise in one after another. A page fades softly into the colour of the next. Motion never hides content from someone who cannot see it, and it stops for visitors who ask their device to reduce motion.

ACCESSIBILITY

Text keeps strong contrast against its background. Every photograph has a description, links are underlined or ringed on focus, and the site works from the keyboard and on a phone.

VOICE

Short, specific, warm.

The studio talks about stories, curiosity and details. Sentences are short and name the thing. The tone invites a conversation with someone who has an ambitious space in mind.

WORDS WE USE

story · curiosity · layered · expressive · artful · details · identity · collaborators · extraordinary ambitions

WRITE

"Every project begins with a different story, and we never repeat a design."

"Have something wild in mind? Let's make it happen together."

AVOID

"We deliver world-class, cutting-edge design solutions."

"Contact page"

Link labels say "Contact us". Headings do not state a project count or a place name for earlier work.
